

Exploring Government/Exploring Economics

By Notgrass

Welcome to Exploring Government and Economics. In this class your students will learn about the government of the U.S. from the beginning to present with an emphasis on biblical guidance and also the Constitution. Each week will consist of lessons for each day and also a project that will need to be completed and brought in. The way that the week and co-op works out, I would suggest making Thursday your first day of the weekly lessons. There will be additional reading in We Hold These Truths and Making Choices. I do expect students to come to class with the lessons read and projects done.

I will not grade any work or hand out tests/quizzes. I am willing to look over papers and give feed back.

Curriculum needed:

Exploring Government student text, We Hold These Truths, and the student review pack

Exploring Economics student text, Making choices, and the student review pack
